Quick Connect Couplings, Plates, Jumpers, HFL's, Docking and Emergency Disconnect Systems

Walther Quick Couplings and Systems guarantee a quick and safe connection / disconnection of Liquids, Gas, Electric / Optical Signals and Electric Lines in Refineries, Offshore and Onshore Rigs, Subsea, Rockets, Space Stations, Petrochemical, Nuclear and Steel Plants, Hospitals, Laboratories and Industries.

Walther Couplings have a long life, extreme resistance to corrosion, ease of use in great depths, aggressive environment and can be safely operated by ROV, Divers, etc..., in pressures from vacuum to 45.000 psi (3.100 bar).

Undertakes the Design, Manufacture & Testing of Subsea & Topside Equipment

- Umbilical Reelers
- Hydraulic Power Units
- Umbilical Sheaves
- Deployment Frames
- Subsea Distribution Units
- Umbilical Termination Assemblies
- Topside Umbilical Termination Units
- Testing & Flushing Rigs
- Onshore & Offshore Manpower Services
- Maintenance & Asset Management Services

Pressure / Flow Control Valves and Actuators Topside, Subsea and Downhole

For over 30 years BIS Valves Designs and Manufactures High Pressure Equipment for Liquid and Gas such as:

- Pressure, Flow Regulating, Metering, Direction Control, Check, Relief, Shuttle, Solenoid, Shut-off, Excess Flow, Pressure Sensing, Pilot Operated Valves
- High-pressure Filters
- Actuators and Solenoid Thrusters
- Pumps, Manifolds, Exotic Materials
- Special Equipment Made By Demand

Valves, Fittings, Tubing and Accessories for Very High Pressure

(up to 150.000 psi / 10.500 bar)

High Pressure Equipment Company

- Needle, Ball, Check, Relief, Safety, Air Driven Valves
- Tubing, Connections, Pressure Vessels, Autoclaves
- Reactors, Pressure Intensifiers, Gauges
- Special Offshore Line for use with H₂S

Materials: 316 Inox, Monel, Inconel, Hastelloy, Tungsten and Exotic Materials

Temperatures: -250° C up to +650° C
